## Letter of Recommendation

This letter is intended to serve as a recommendation for **Ms. Sakshi Chitnis**, a dedicated and sincere student who has completed her **Bachelor of Technology in Computer Science Engineering**, batch 2018-22 from **Gyan Ganga College of Technology**, Jabalpur. I had the privilege to closely observe Sakshi's 4 years academic journey and her consistent efforts towards excellence throughout her undergraduate studies.

She has consistently demonstrated a strong grasp of core computer science fundamentals and an enthusiasm for applying them to real-world projects. She excelled in courses such as **Operating Systems (OS)** and **Database Management Systems (DBMS)**, where her understanding extended beyond theory into practical application. Her ability to connect conceptual learning with hands-on implementation reflects her analytical thinking, curiosity, and commitment to mastering her field.

One of her standout qualities is ability to handle complex projects with dedication and creativity. She has developed two major projects from scratch, including a **department application using Flutter** and a **Health Care Management System** built with **Spring Boot and MySQL**. She took ownership of **refactoring microservices** and designing the **backend architecture**, ensuring scalability and performance. Her strong interest in **optimization and system design** reflects her deep understanding of **application development, database management, and problem-solving**.

In addition to her academic achievements, she actively participated in **National-level Hackathons**, including the **National Hackathon** and the **Smart India Hackathon**, where she demonstrated creativity, teamwork, and strong technical aptitude. Her participation in these events highlights her enthusiasm for learning beyond the classroom and her ability to perform under challenging, competitive environments.

Her clarity of thought, perseverance, and adaptability make her a strong candidate for higher studies. She possesses both the technical competence and the personal discipline necessary to succeed in advanced academic and research environments.

In conclusion, I strongly recommend **Ms. Sakshi Chitnis** for admission to your esteemed university's **Master's program in Computer Science**. I am confident that she will continue to excel and make meaningful contributions to the academic community.

With Best Wishes
